**Re: EPA-OPP-2023-0474; Endocrine Disruptor Screening Program: Near-Term Strategies for Implementation**

The Pesticide Policy Coalition (PPC) respectfully requests a 90-day extension to the comment period on the Environmental Protection Agency's (EPA or the Agency) Endocrine Disruptor Screening Program: Near-Term Strategies for Implementation.

The PPC represents agriculture, food, fiber, public health, pest management, landscape, environmental, and related industries, including small businesses/entities, which are dependent on the availability of pesticides. Our coalition supports development and implementation of public policies and laws that utilize the best available science and technology to ensure protection of human health and the environment.

PPC members include national and regional trade associations; commodity, specialty crop, and silviculture organizations; cooperatives; food processors and marketers; pesticide manufacturers, formulators, and distributors; pest and vector-control applicators and operators; research organizations; state departments of agriculture; equipment manufacturers, and other interested stakeholders. The PPC serves as the unifying voice for the review, discussion, development and advocacy on pest management regulation and policy that is based on the best available science.

The public is increasingly confronted with pest pressure, resistance management concerns and disease threats introduced into the United States via trade, weather, and other factors. It is through pest control products, used by farmers, ranchers, public health officials, and other pesticide applicators; and produced by pesticide manufacturers, that we can address and mitigate these threats. These products are essential tools for users to protect not only America's food,

fiber, and biofuel; but also, to protect public health from vector-borne disease, safeguard our infrastructure from the damage caused by pests, and mitigate the increasing threat to the environment from invasive species.

The PPC and other interested stakeholders must have adequate time to gather the requested feedback on strategies to implement the program and for registrants to collect the requested data. The current comment period does not allow sufficient time to gather the requested information from multiple experts.

Additionally, there are concurrent open dockets on which the PPC and other relevant stakeholders will also submit substantive comments or actively participate in, including the November Pesticide Program Dialogue Committee (PPDC). The upcoming holidays will also limit PPC's interaction with EPA and other experts if there are questions.

The PPC respectfully requests an extension to the public comment period by 90 days to allow all stakeholders an opportunity to develop and submit comments on these important proposed changes. If PPC members can be of assistance in any way, or if you have questions, please do not hesitate to contact me at [shensley@cotton.org](mailto:shensley@cotton.org) or (703) 475-7716.

A handwritten signature in black ink that reads "Steve Hensley". The signature is written in a cursive, flowing style.

Steve Hensley
